Summary

Mid-level software engineer with full-stack experience in Java, JavaScript, and cloud platforms. Delivered a cyber-simulation tool that saved $23,000 annually and improved API response times by 40% in a financial analytics product. Designed and built user-focused interfaces for a knowledge-sharing platform using React and integrated AI-driven personalization features. Seeking to apply proven development and performance-optimization skills to drive reliable, scalable solutions for your team.

EDUCATION

George Mason University **Jan 2024 - Dec 2025**

Master of Science, Computer Science *Fairfax, VA*

- **GPA:** 3.7

Chitkara University **Aug 2018 - Jul 2022**

Bachelor of Engineering, Computer Science *Rajpura, India*

- **GPA:** 9.82/10.0

EXPERIENCE

onAir Tech Corporation

Software Developer *Remote* · **Feb 2026 - Present**

- Designed and implemented user interfaces for the onAir knowledge-sharing platform with React, JavaScript, HTML, and CSS, improving usability through iterative testing and refinement
- Integrated REST APIs with Java to deliver dynamic, data-driven user experiences and collaborated with AI/ML teams to add content-recommendation and personalization features, which increased user engagement
- Supported cloud performance by monitoring AWS resources and optimizing the platform, which helped maintain scalable and reliable deployments

Gemini Solutions Pvt. Ltd.

Software Engineer L2 *Panchkula, India* · **Apr 2023 - Dec 2023**

- Consulted for PIMCO and enhanced a legacy financial analytics backend using Java, Spring, and Oracle DB, preserving production integrations and meeting SLAs
- Led backend efforts by reviewing 30+ pull requests per month and enforcing consistent Git workflows-including branching, merges/rebases, and clean history-resulting in low-risk legacy changes and maintaining system stability

Software Engineer L1 *Panchkula, India* · **Jun 2022 - Mar 2023**

- Developed and optimized REST APIs for Clovek Wealth, integrated SOAP services, tuned SQL queries, and shipped Angular modules, improving response times by 40%
- Reduced production issues by adding validation, defensive error handling, and backward-compatible changes; resolved 10+ recurring bugs.
- Built Cyber-Simulation to replace “PhishingBox”; saved $23,000/year and identified 14% employees lacking phishing awareness.

Technical Trainee *Panchkula, India* · **Apr 2021 - May 2022**

- Trained in Angular, Python, Spring Boot, DB design, and SQL; delivered 15+ feature and bug-fix tickets for internal tools, enhancing functionality and reducing the issue backlog
- Built Contripoint rewards app with dashboard, leaderboard, and wallet; integrated HR/payroll data and delivered early profit of $10,000.
- Followed team Git practices including branches, structured commits, and review feedback to keep changes trackable and release-ready.

PROJECTS

EarthLens | EarthLens

- Native macOS App: Built a menu-bar app that turns curated Google Earth satellite imagery into desktop wallpapers with a lightweight native macOS experience.
- Scheduling & UX: Implemented on-demand wallpaper refresh, auto-rotate cadence, curated region selection, and a SwiftUI interface aligned with macOS Liquid Glass design.

Rung | Rung

- Cross-Platform Habit App: Building a habit tracker for iPhone, iPad, and Mac with SwiftUI, SwiftData persistence, and HealthKit-verified completions to reduce false streak tracking.
- AI & Backend Sync: Added on-device AI nudges using Apple FoundationModels and a Spring Boot backend for cross-device habit and progress synchronization.

ACHIEVEMENTS & PATENT

- **Zolve Visionary Leader (2024):**Recognized for academic excellence, leadership, and community service.
- **On the Spot Award (2022):**Gemini Solutions project performance award.
- **Patent Filed (2019):**Anti-Theft System For A Vehicle at Chitkara CURIN; Arduino + GPS tracking with mobile-app control.

SKILLS

- **Languages**: Java, Python, JavaScript, TypeScript, SQL, Swift
- **Frameworks/Libs**: Spring Boot, Spring, Hibernate/JPA, Node.js/Express, Angular, React, Next.js, SwiftUI, SwiftData
- **Databases**: PostgreSQL, Oracle, MySQL
- **Cloud/DevOps**: AWS, Docker, Kubernetes, Jenkins, Git, GitHub Actions, CI/CD
- **Product/Apple**: macOS, iOS, HealthKit, FoundationModels, REST APIs, Performance Optimization, Code Reviews
