Experience

onAir Tech Corporation — Remote
Software Developer — *Feb 2026 - Present*

- Develop and maintain full-stack features across a **React/JavaScript frontend and WordPress-backed platform**, including discussions, content rendering, favorites, and administrative workflows.
- Improve platform reliability with explicit error handling, empty-state guards, client-side state synchronization, and responsive media behavior.

Gemini Solutions Pvt. Ltd. — Panchkula, India
Senior Software Engineer L1 — *Apr 2023 - Dec 2023*

- Enhanced PIMCO's financial analytics backend using **Java, Spring, Oracle, and SQL**; designed relational database changes while preserving legacy integrations and production service commitments.
- Mentored team members and new hires, led recurring code reviews, and enforced branching, rebase, and engineering practices for controlled releases.

Software Engineer L2 — *Apr 2022 - Mar 2023*

- Built and optimized REST APIs, integrated SOAP services, tuned SQL queries, and shipped Angular modules for Clovek Wealth, improving response time by **40%**.
- Containerized application components with **Docker** and supported **Jenkins CI/CD deployments to AWS**; built Cyber-Simulation, saving **$23,000 annually**.

Software Engineer L1 — *Apr 2021 - Mar 2022*

- Built the Contripoint rewards application with HR/payroll integrations and delivered **15+** feature and defect tickets across Spring Boot, Angular, Python, and SQL services.

Technical Trainee — *Apr 2020 - Mar 2021*

- Completed enterprise-development training in Spring Boot, REST APIs, Angular, Python, relational database design, SQL, and Git.

Selected Projects

Rung Backend | Java 17, Spring Boot, Spring Security, JPA, PostgreSQL, Redis, SSE

- Designed a Spring Boot backend spanning authentication, habit tracking, mentoring, progress, subscriptions, and data portability with **27 REST controllers**, JWT security, PostgreSQL/Flyway migrations, and real-time SSE synchronization.
- Hardened production paths with Apple Sign-In and App Attest verification, encrypted PII with key rotation, Redis/Bucket4j rate limiting, ShedLock scheduling, Testcontainers integration tests, JaCoCo coverage gates, and Trivy CI scanning.

RoleDesk | FastAPI, Python, SwiftUI, Anthropic/OpenAI, Pydantic, Playwright, SQLite

- Engineered a SwiftUI desktop client and packaged FastAPI sidecar for job discovery, scoring, document generation, ATS form assistance, and outreach over REST/WebSockets.
- Built typed Anthropic/OpenAI integrations with Pydantic validation, provider selection, prompt caching, token/cost/latency telemetry, daily budget enforcement, and truth-preserving generation rules.

EarthLens - Mac App Store | SwiftUI, AppKit, SMAppService, macOS

- Published a privacy-first macOS menu-bar wallpaper app with scheduled rotation, local caching, login-item integration, and multi-display support.

Technical Skills

Languages:	Java, Python, TypeScript, JavaScript, SQL, Swift
Backend:	Spring Boot, Spring Security, Spring Data JPA/Hibernate, REST, SOAP, JWT, SSE, WebSockets, FastAPI
Data:	PostgreSQL, Oracle, MySQL, Redis, SQLite, Flyway
Cloud/DevOps:	AWS, Docker, Kubernetes, Jenkins, GitHub Actions, CI/CD, Git
Testing/AI:	JUnit, Testcontainers, JaCoCo, pytest, Anthropic API, OpenAI provider integration, structured outputs

Education

George Mason University, M.S. Computer Science — Fairfax, VA | Jan 2024 - Dec 2025 | GPA: 3.7
Chitkara University, B.E. Computer Science — Rajpura, India | Aug 2018 - Jul 2022 | GPA: 9.82/10.0
